

## **Desktop and Laptop Setup and Updates**

Keep your computers secure, up to date, and running smoothly without the hassle.

Common problems we fix

- Out-of-date systems that miss important Windows and security updates
- No antivirus or inconsistent protection across devices
- Time wasted visiting each PC to install updates or apps
- No clear inventory of how many computers you have or when they need replacing
- Slow or unstable machines because updates and maintenance are ignored

What we do (simple)

- Central management: one dashboard to see and manage all desktops and laptops
- Automatic updates: schedule Windows and app updates for every device
- Antivirus setup: install and keep protection current on all machines
- Remote installs and patches: update apps without visiting each PC
- Asset tracking: list of devices, ages, and replacement recommendations
- Performance checks: identify slow machines and fix common issues
- Backup and recovery: protect important files and restore when needed

Benefits for your business

- Less downtime and fewer support visits
- Stronger security across every computer
- Save time by managing updates centrally
- Clear visibility of your hardware and lifecycle planning
- Happier staff with faster, more reliable computers

Up to date. Secure. Managed. Ready to make PC care easy? Get a quick assessment and a simple plan. Call or email us today to secure and manage your desktops and laptops.
