

## Office Internet and Network Setup

Is your office Wi-Fi slow, unreliable, or insecure? Get a fast, stable, and safe network that just works.

Common problems we fix

- **Weak Wi-Fi** in parts of the office
- **Frequent dropouts** during work or meetings
- **Slow video calls** and laggy conferencing
- **One shared password** for everyone and guests
- **Employees using streaming, social media or games** on company devices
- **Hard to share files** because the network is not configured right
- **Too many devices** causing congestion (computers, phones, printers)
- **Outdated router or firewall** that risks security
- **No way to monitor internet use** or control access

What we provide (simple)

- **Office Wi-Fi design:** proper routers and access points for full coverage
- **Separate networks:** one for staff, one for guests, one for devices like printers
- **Access controls:** block sites or apps during work hours; restrict games and streaming
- **Strong passwords and security:** up-to-date firewalls and safe settings to stop hackers
- **Monitoring and reports:** see who's using bandwidth and what they're doing
- **Fast setup and testing:** ensure good speed for video calls and file sharing
- **Ongoing support:** updates, backups, and fixes when needed

Benefits for your business

- **Fewer interruptions** so staff stay productive
- **Safer data** and less risk of breaches
- **Better meetings** with stable video calls
- **Clear control** over internet use and access
- **Easier file sharing** and smoother business systems

Ready for reliable Wi-Fi? Get a free site check or quick quote. Call or email us today and we'll make your office network fast, secure, and simple to use. **Fast. Secure. Reliable.**
